DETAILED ACTION

Claims 1-12 are pending in this application. Priority date has been established to August 14, 2001 and all priority papers have been received.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by U.S. Patent No. 5,247,450 to Clark et al.
- Referring to claim 1, Clark shows a method for controlling a glass forming machine, said glass forming machine, said glass forming machine comprising a plurality of processing units (Column 1, lines 16-20 and Figure 1), the method comprising the steps of: providing at least one integrated bus system ("Data Cable 25" figure 1 and Column 3, lines 29-65); providing a central controller ("Master controller 10" Column 3, line 10); said central controller and the plurality of processing units connected to the integrated bus system (figure 1); and the central controller transmitting at least one of parameterization data, synchronization data, motion information and motion path information data via the at least one integrated bus system ("motion control" figure 1).

Application/Control Number: 10/780,543 Page 3

Art Unit: 2125

4. Referring to claim 2, Clark shows a plurality of cams, and the central controller centrally manages the plurality of cams. Examiner notes that cams is taken to mean "computer aided manufacturing machines" as this is the accepted meaning of the term in the art and the specification has not established another meaning. This computer aided manufacturing is clearly shown in Clark although it is not referred to as a "cam" at column 1, line 33 which notes 'individual control computers" for each section component.

- 5. Referring to claim 3, Clark shows where certain cams of the plurality of cams are prioritized (Column 5, lines 37-53).
- 6. Referring to claim 4-10, Clark has shown all aspects of these claims with reference to claims 1-3 above. Claims 4-10 re-order the claim elements, but a separate explanation of each claim should not be necessary as all claim elements have been shown with regard to claims 1-3.
- 7. Referring to claims 11 and 12, Clark shows wherein the device is an automation component which includes control functionality ("electronic timing control system" Abstract).

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and to the state of the art at the time of invention. All art cited and not used is related to controllers for glass blowing production systems. Applicant should note that many of the references cited could also have been used as USC 102 rejection art for the claims as they are written.

Art Unit: 2125

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael D. Masinick whose telephone number is (571) 272-3746. The examiner can normally be reached on Mon-Fri, 7:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Leo Picard can be reached on (571) 272-3749. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
